

Scientific Commissioning Support

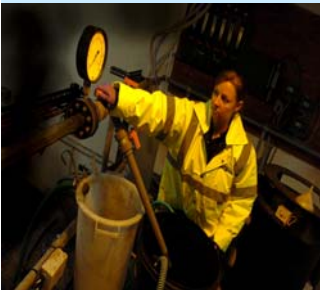

Assistance

WatStech can provide on-site assistance direct to commissioning engineers, prior to or during installation and operation of new plant for water or wastewater treatment.

Analysis

Our skilled operatives can provide on site monitoring and analysis of water and wastewater, using a mobile scientific laboratory. We can provide support ranging from hourly to daily or weekly sampling to provide instantaneous analytical data to assist with decision making.

Appraisal

The trained and experienced team can offer total support such as; design feasibility studies, commissioning analysis, handover, post project appraisals and asset audits or reviews.

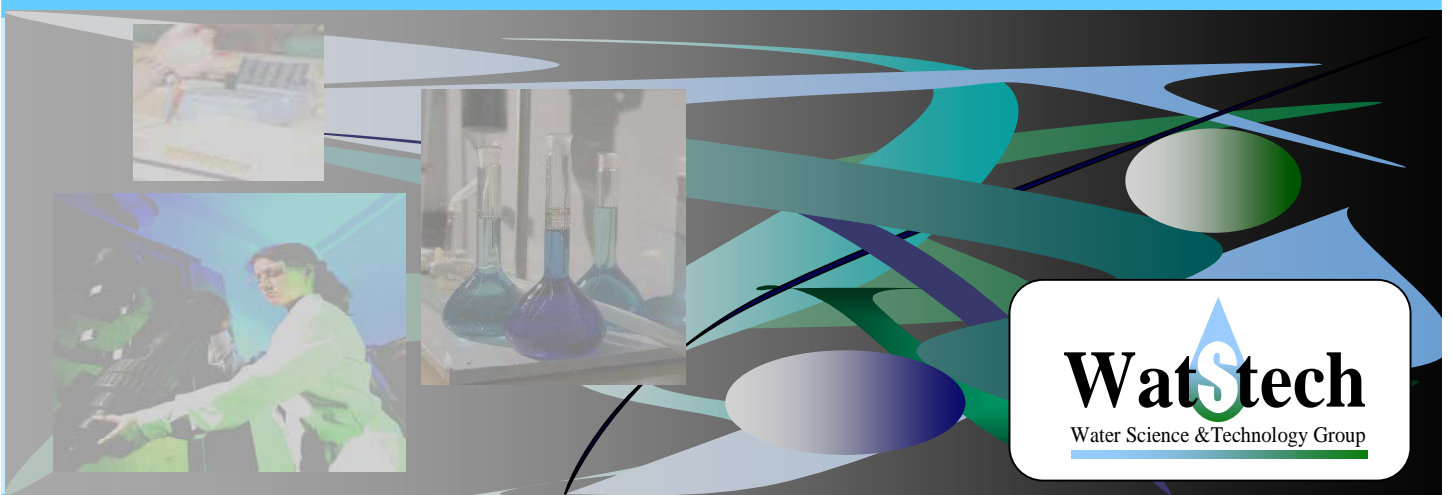

Scientific Support

FULL-SCALE

Plant performance evaluation
Process monitoring
Review and optimisation
Assist with production of O & M manuals
Using fully equipped mobile laboratory

PILOT-SCALE

Operation and monitoring
Process selection
Design criteria
Using fully trained staff

Team working

TRAINING

For post-handover operation

Encourage operator involvement

Develop customised training schedules

Deliver training packages

Assess knowledge transfer

COLLABORATION

With site engineers

With commissioning teams

With plant operators
